# Demography

## Estimated resident population

The estimated resident population (ERP) figure is the official population estimate. For sub-state geographies, ERP figures are updated annually using a model which includes administrative data that indicate population change, such as registered births and deaths, dwelling approvals, Medicare enrolments and electoral enrolments. Data are updated annually with a release approximately 9 months after the reporting period. The next planned update is in April 2020.

As at 30 June 2018, the estimated resident population for Wynnum SA2 was

# 14,145 persons

### Wynnum SA2

- ERP of 14,145 persons as at 30 June 2018
- Average annual growth rate of 1.0% over five years
- Average annual growth rate of 1.4% over ten years

### Queensland

- ERP of 5,011,216 persons as at 30 June 2018
- Average annual growth rate of 1.5% over five years
- Average annual growth rate of 1.7% over ten years

## Population by age and sex

The estimated resident population (ERP) figure is the official population estimate. For sub-state geographies, ERP figures are updated annually using a model which includes administrative data that indicate population change, such as registered births and deaths, dwelling approvals, Medicare enrolments and electoral enrolments. Data are updated annually with a release approximately 12 months after the reporting period. The next planned update is in September 2019.

As at 30 June 2017, the proportion of the estimated resident population aged 65 years and over for Wynnum SA2 was

# 16.1%

### Wynnum SA2

- 18.3% aged 0–14 years as at 30 June 2017
- 65.5% aged 15–64 years
- 16.1% aged 65+ years

### Queensland

- 19.6% aged 0–14 years as at 30 June 2017
- 65.3% aged 15–64 years

## Median age

The median age is the age at which half the population is older and half is younger. These median age estimates have been calculated by the ABS and Queensland Treasury using single year of age estimated resident population data. Data are updated annually with a release approximately 12 months after the reporting period. The next planned update is in September 2019.

As at 30 June 2017, the median age for Wynnum SA2 was

# 41.3 years

### Wynnum SA2

- Median age of 41.3 years as at 30 June 2017
- Increase of 1.9 years from median age of 39.4 years as at 30 June 2007

### Queensland

- Median age of 37.1 years as at 30 June 2017
- Increase of 0.9 years from median age of 36.2 years as at 30 June 2007

## Population projections

The 2018 edition of the Queensland Government population projections are generated by applying assumptions regarding future trends in the components of population change (fertility, mortality and migration) and the latest planning and development intelligence available. Data are based on the medium series and are updated twice every five years. The next planned update is in November 2021.

From 2016 to 2041, the population for Wynnum SA2 is projected to increase from

**13,691 persons to  
18,961 persons**

### Wynnum SA2

- Population projected to be 18,961 persons as at 30 June 2041
- Increase of 1.3% per year over 25 years

### Queensland

- Population projected to be 7,161,661 persons as at 30 June 2041
- Increase of 1.6% per year over 25 years

## Median age projections

The median age is the age at which half the population is older and half is younger. These median age projections have been calculated by Queensland Treasury using the Queensland Government population projections, 2018 edition. Data presented in this topic are based on the medium series. Data are updated twice every five years. The next planned update is in November 2021.

As at 30 June 2041, the median age projection for Wynnum SA2 is

# 46.0 years

### Wynnum SA2

- Median age projection of 46.0 years as at 30 June 2041
- Increase of 3.4 years from a median age projection of 42.5 years as at 30 June 2021

### Queensland

- Median age projection of 40.7 years as at 30 June 2041
- Increase of 2.8 years from a median age projection of 37.9 years as at 30 June 2021

## Births and deaths

Birth and death statistics are an estimate of the number of births and deaths that have been registered in Australia's state and territory Registries of Births, Deaths and Marriages over a calendar year. These estimates are useful for two distinct purposes – use as a component of population growth and for analysis of fertility and mortality. Data are updated annually with a release approximately 12 months after the reporting period. The next planned update is in December 2019.

### Wynnum SA2

- 167 registered births in 2017
- 103 registered deaths

### Queensland

- 61,158 registered births in 2017
- 31,555 registered deaths

The number of registered births in 2017 to mothers with a usual residence in Wynnum SA2 was

# 167 births

## Family composition

In the context of the 2016 Census of Population and Housing, families are classified in terms of the relationships that exist between a single family reference person and each other member of that family. The family composition variable distinguishes between different types of families based on the presence or absence of couple relationships, parent-child relationships, child dependency relationships or other familial relationships, in that order of preference. This is based on families by place of usual residence.

### Wynnum SA2

- 3,559 families
- 44.4% of total families were couple families with children

### Queensland

- 1,221,148 families
- 42.5% of total families were couple families with children

## Dwellings by dwelling structure

In general terms, a dwelling is a structure which is intended to have people live in it, and which is habitable on Census Night. The dwelling structure variable classifies the structure of private dwellings enumerated in the 2016 Census of Population and Housing. This information is determined by the Census collector and is based on occupied private dwellings.

The percentage of total occupied private dwellings in Wynnum SA2 which were separate houses was

# 75.2%

### Wynnum SA2

- 3,778 occupied private dwellings (or 75.2%) were separate houses

### Queensland

- 1,269,653 occupied private dwellings (or 76.6%) were separate houses

## Dwellings by tenure type

In general terms, a dwelling is a structure which is intended to have people live in it, and which is habitable on Census Night. The tenure type variable describes whether a household rents or owns the dwelling in which they were enumerated on Census Night 2016, or whether the household occupies it under another arrangement. This is based on occupied private dwellings.

The percentage of total occupied private dwellings in Wynnum SA2 which were fully owned was

# 27.5%

### Wynnum SA2

- 1,381 occupied private dwellings (or 27.5%) were fully owned

### Queensland

- 471,407 occupied private dwellings (or 28.5%) were fully owned

## Homeless persons

Homelessness is a lack of one or more elements that represent 'home'. When a person does not have suitable accommodation alternatives, the ABS defines someone as homeless if their current living arrangement:

- is a dwelling that is inadequate,
- has no tenure, or if their initial tenure is short and not extendable, or
- does not allow them to have control of, and access to, space for social relations.

These counts are based on place of enumeration.

### Wynnum SA2

- 50 homeless persons
- 38.6 homeless persons per 10,000 persons

### Queensland

- 21,715 homeless persons
- 45.6 homeless persons per 10,000 persons

The rate of homeless persons for Wynnum SA2 in 2016 was

## Number of motor vehicles per dwelling

The number of motor vehicles variable records the number of registered motor vehicles, which are owned or used by members of a household, and which are garaged or parked near the occupied private dwelling on Census Night 2016. This is based on occupied private dwellings by place of enumeration.

The percentage of dwellings in Wynnum SA2 with 3 or more motor vehicles was

# 17.0%

### Wynnum SA2

- 9.2% of dwellings had no motor vehicles
- 17.0% of dwellings had 3 or more motor vehicles

## Australian Early Development Census (AEDC)

The AEDC is a national collection of information about how children are developing prior to school. Every three years, teachers complete an instrument for each child in Prep. The AEDC instrument encompasses five domains of early childhood development which are predictors of a child's health, education and social outcomes. The five domains are:

- physical health and wellbeing
- social competence
- emotional maturity
- language and cognitive skills
- communication skills and general knowledge.

The AEDC reports whether children are on track, at risk or developmentally vulnerable across each of the five domains. Children that are developmentally vulnerable demonstrate much lower than average competencies in that domain.

### Wynnum SA2

- 28.8% developmentally vulnerable children in one or more domains in 2018
- 11.0% developmentally vulnerable children in two or more domains in 2018
- The social competence domain had the largest percentage of developmentally vulnerable children (14.3%)

### Queensland

- 25.9% developmentally vulnerable children in one or more domains in 2018
- 13.9% developmentally vulnerable children in two or more domains in 2018
- The physical health and wellbeing domain had the largest percentage of developmentally vulnerable children (12.3%)

The percentage of developmentally vulnerable children in two or more domains in Wynnum SA2 in 2018 was

## Persons with a profound or severe disability

Persons with a profound or severe disability has been derived from the 2016 Census of Population and Housing variable 'Core activity need for assistance'. Persons with a profound or severe disability are defined as needing help or assistance in one or more of the three core activity areas of self-care, mobility and communication because of a long term health condition (six months or more), a disability (lasting six months or more), or old age. This is based on persons by place of usual residence.

The percentage of persons in Wynnum SA2 in need of assistance with a profound or severe disability was

**5.8%**

### Wynnum SA2

- 768 persons (or 5.8%) in need of assistance with a profound or severe disability

### Queensland

- 243,267 persons (or 5.2%) in need of assistance with a profound or severe disability

## Aged care services

Information on aged care services are provided by the Commonwealth Department of Health. Information are based on the location of the service, rather than the region in which the service is delivered. In some instances, aged care services may have provided the address information of their approved provider in place of the address information of the individual aged care service. Users should be aware of this limitation when using these data. Aged care services are subsidised by the Australian Government under the Aged Care Act 1997. Data are updated annually with a release approximately 12 months after the reporting period. The next planned update is in October 2019.

The number of aged care service operational places in Wynnum SA2 as at 30 June 2018 was

# 126 places

### Wynnum SA2

## The Index of Relative Socio-Economic Disadvantage

Socio-Economic Indexes for Areas (SEIFA) is a summary measure of the social and economic conditions of geographic areas across Australia. SEIFA, which comprises a number of indexes, is generated by ABS from the Census of Population and Housing. In 2016 an Index of Relative Socio-Economic Disadvantage was produced, ranking geographical areas in terms of their relative socio-economic disadvantage. The index focuses on low-income earners, relatively lower education attainment, high unemployment and dwellings without motor vehicles. Low index values represent areas of most disadvantage and high values represent areas of least disadvantage. This is based on persons by place of usual residence.

### Wynnum SA2

- 16.6% in least disadvantaged quintile
- 9.0% in most disadvantaged quintile

### Queensland

- 20.0% in least disadvantaged quintile
- 20.0% in most disadvantaged quintile

The percentage of persons in Wynnum SA2 in the least disadvantaged quintile was

## Building approvals

Information on building approvals are compiled by the ABS, and are collected from sources such as local government authorities and other principal certifying authorities. The estimates for any month may be revised or corrected in later months. This can occur as a result of corrections made by a provider of data, the late provision of approval records and, occasionally, by approvals being identified after construction work has commenced. Data are updated monthly with a release approximately 2 months after the reporting period. The next planned update is in April 2019.

### Wynnum SA2

# Environment

## Protected areas – parks, forests and reserves

Protected areas are derived from a spatial dataset sourced from the Queensland Department of Environment and Science. Data presented in this table are based on areas located above mean sea level. Areas are based on a GIS calculated cartesian area and not the official gazetted area. GIS calculations are referenced to GDA94 / Australian Albers (EPSG:3577). Data are updated every two years. The next planned update is in June 2020.

### Wynnum SA2

- There were no protected areas as at 2018

### Queensland

- Protected area of 129,924.3 km<sup>2</sup> as at 2018
- Largest protected area type was National Parks with 97,683.2 km<sup>2</sup>

There were no protected areas within Wynnum SA2 as at 2018

# Explanatory notes

## Profile explanatory notes

### Australian Statistical Geography Standard (ASGS)

A geographical framework covering all spatial areas of Australia and its external territories. The ASGS was developed by the Australian Bureau of Statistics (ABS) to allow statistics from different collections to be spatially comparable. The ASGS replaced the Australian Standard Geographical Classification (ASGC).

### Average annual growth rate

It is calculated as a percentage using the formula below, where  $P_0$  is the population at the start of the period,  $P_n$  is the population at the end of the period and  $n$  is the length of the period between  $P_n$  and  $P_0$  in years.

$$\left[ \left( \frac{P_n}{P_0} \right)^{\frac{1}{n}} - 1 \right] \times 100$$

For example, to calculate the average annual rate of population change from 2006 to 2016,  $n$  is ten,  $P_0$  is the population in 2006 and  $P_n$  is the population in 2016.

### Cell confidentialisation

This profile utilises two types of data confidentialisation.

1. Source data confidentialisation - This refers to datasets that have been confidentialised by the data custodians. For example census data supplied by the ABS have small cell counts of 1 or 2 confidentialised to 0 or 3 and a small random adjustment made to all data to avoid any risk of releasing identifiable information. Caution should therefore be used when interpreting data where the cell count is small.
2. Concordance confidentialisation - This refers to datasets that have been concorded to a new geography and the resulting cell count is small. No reliance should be placed on these cell counts and as such have been confidentialised. Tables utilising this type of confidentialisation will report the cell as less than a specific value (for example <5).

### Census 2016 data

Census data have 'small random adjustments' to ensure no data are released which could risk identifying individuals. As such, cells containing very small counts should be treated with extreme caution. Therefore discrepancies may occur between the sum of the component items and total.

### Census undercount

Due to the size and complexity of the Census of Population and Housing, whenever a Census is conducted it is inevitable that some people will be missed and some will be counted more than once. After each Census, the Australian Bureau of Statistics conduct a Post Enumeration Survey to estimate the number of people who should have been counted in the Census and the actual Census counts. It is important to note, that all Census data reported in this profile do not have any adjustments made for Census undercount and readers should keep this in mind when making inferences from the data.

### Land area

Land area, as stated in the Region overview, are based on the Australian Albers Equal Area projection (EPSG 3577).

**Region overview**

Statistics in the profile overview have been derived from data sourced to the Bureau of Meteorology and aggregated to administrative boundaries. Land area are based on the Australian Albers Equal Area projection (EPSG 3577).

**Rounding**

Figures are rounded to nearest whole number. Calculations (such as percentages and rates) are based on pre-rounded figures.

**Specialisation ratio**

The ratio of the percentage for the Wynnum SA2 to the percentage for Queensland. A specialisation ratio above 1.00 indicates Wynnum SA2 has a larger share for that category than in Queensland. Similarly a specialisation ratio below 1.00 indicates Wynnum SA2 has a smaller share for that category than in Queensland.

**Statistical Area Level 2**

Statistical Area Level 2s (SA2s) (2016) are small areas, approximately suburb size, with a population range of between 3,000 to 25,000 persons, and have an average population of about 10,000 persons. There are 528 SA2 regions that cover the state.

## Topic explanatory notes

**Aged care services****Home care services**

Following the Increasing Choices changes on 27 February 2017, places for the Home Care Packages Program are now assigned to consumers and not to services. Correspondingly, places data for the Home Care Packages Program are no longer captured in the stocktake. These figures only include flexible home care places in the: Multi-Purpose Service (MPS) Program, Aged Care Innovative Pool Program and the National Aboriginal and Torres Strait Islander Flexible Aged Care Program.

**Residential care**

Residential care provides a range of supported accommodation services for older people who are unable to continue living independently in their own homes. The figures here include flexible residential care places in the: Multi-Purpose Service (MPS) Program, Aged Care Innovative Pool Program and the National Aboriginal and Torres Strait Islander Flexible Aged Care Program.

**Restorative care**

Restorative care program provides a package of services to enable older people after a hospital stay to return home rather than prematurely enter residential care. The program also gives older people and their families and carers time to consider long-term care arrangements. These figures include places in the Transition Care Program and the Short-Term Restorative Care Program.

## Australian Early Development Census (AEDC)

### Confidentialisation

Suppression of AEDC data also occurs when one or more of the following have not been met:

- Fewer than 15 children had valid AEDC scores
- Less than two teachers had completed AEDC checklists for children in that location
- AEDC checklists were completed for less than 80% of all non special needs children

Additional minor suppressions have occurred where necessary to preserve confidentiality of related suppressed cells. Whilst some regions have had results suppressed, some SA2s have been included in neighbouring regions. This list includes:

- Albion included in Windsor
- Aurukun included in Cape York
- Croydon - Etheridge included in Tablelands
- Enoggera Reservoir included in Enoggera
- Far Central West included in Far South West
- Fortitude Valley included in New Farm
- Ingham Region included in Palm Island
- Lake Manchester - England Creek included in Lowood
- Lamb Range included in Kanimbla - Mooroolbark
- Mackay Harbour included in Andergrove - Beaconsfield
- Magnetic Island included in Belgian Gardens - Pallarenda
- Main Beach included in Surfers Paradise
- Mount Coot-tha included in The Gap
- Peregrine Beach - Marcus Beach included in Peregrine Springs
- South Brisbane included in West End
- Spring Hill included in Brisbane City
- Wooroonooran included in Babinda

### Developmentally 'vulnerable'

The cut-off for an AEDC score to represent developmentally vulnerable is based on the results from the 2009 AEDC data collection. In 2009 children who scored below the 10th percentile (in the lowest 10 per cent) of the national population were classified as developmentally vulnerable.

### Developmentally vulnerable on one or more domain/s

The percentage of children in the community who have at least one AEDC domain score/s below the 10th percentile.

### Developmentally vulnerable on two or more domain/s

The percentage of children in the community who have at least two AEDC domain scores below the 10th percentile.

### Domain: Communication skills and general knowledge

This domain measures a child's communication skills and general knowledge.

### Domain: Emotional maturity domain

This domain measures a child's pro-social and helping behavior, anxious and fearful behavior, aggressive behavior and hyperactivity and inattention.

### Domain: Language and cognitive skills domain

This domain measures a child's basic literacy, interest in literacy/numeracy, memory and basic and advanced literacy.

### Domain: Physical health and wellbeing domain

This domain measures a child's physical readiness for the school day, physical independence and gross and fine motor skills.

### Domain: Social competence domain

This domain measures a child's overall social competence, responsibility and respect, approaches to learning and readiness to explore new things.

## Births and deaths

### Births

Births data are based on the number of births registered during a calendar year by place of usual residence of the mother. This is different to the number of births which occurred during a calendar year. For further information on the differences between estimates of registered births and births occurring in a time period, refer to ABS website (cat. no. 3301.0).

As a result of changes in the timeliness of registration of births in Queensland, care should be taken when interpreting changes in Queensland births between 2006 and 2010. This lag has reduced in recent years, indicating potential improvements in the timeliness of registration of births in Queensland.

### Deaths

Deaths data are based on the number of deaths registered during a calendar year by place of usual residence of the deceased. This is different to the number of deaths which occurred during a calendar year. For further information on the differences between estimates of registered deaths and deaths occurring in a time period, refer to ABS website (cat. no. 3302.0).

## Business counts

It is not currently possible to account for those businesses which operate out of multiple locations, other than at their main location. This is particularly relevant for larger businesses, which commonly establish outlets in several or all states and many regions across Australia. The reason for this is that data pertaining to individual business locations are not currently available from the Australian Bureau of Statistics Business Register. Users should therefore be aware of this limitation when using counts of businesses included in this table.

Due to the process of confidentialisation applied by the ABS, discrepancies may occur between the sums of the component items and total (see paragraph 49 of ABS cat. no. 8165.0 explanatory notes for more information).

## Business counts by industry

Based on Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 edition.

The 'Not classified' industry division is accurate at the time of release of data. Further refinements to this group will be made in subsequent releases, but will not be reflected in these counts.

## Country of birth

The list of countries are based on the most common Country of Birth responses (excluding Australia) reported in the 2011 Census. The categories of persons born in ESB and NESB countries are derived by aggregating countries from Table G09 of the General Community Profile (GCP). Due to the process of confidentialisation applied to the Census data by the ABS, total persons born overseas have been taken directly from Table G01 of the GCP to provide a more accurate count.

## Department of Social Services payments

Data are extracted at a point in time, usually towards the end of the quarter.

### Confidentialisation

Cell counts under 5 have been suppressed for confidentiality purposes.

### Age pension

Age pension is a support payment for people who have reached the qualifying age. From 1 July 2013, the qualifying age for both men and women is 65 years. From 1 July 2017 the age pension qualifying age will progressively increase for non-veterans from 65 years to 67 years, reaching 67 years in 2023.

Age pension recipients have the choice of having their age pension paid by either the Department of Human Services (DHS) or the Department of Veterans' Affairs (DVA). DHS pays the vast majority of age pensions. The data in this report only includes data for the DHS customers.

### Carer allowance

A Carer allowance is a supplementary payment for carers who provide daily care and attention at home for a person with a disability, severe medical condition or who is frail and aged.

### Disability support pension

A Disability support pension (DSP) is an income support payment for people who are unable to work for 15 hours or more per week at or above the relevant minimum wage, independent of a program of support due to permanent physical, intellectual or psychiatric impairment. A DSP claimant must be aged 16 years or over and under Age pension age at date of claim, however once in receipt of DSP, a person can continue to receive DSP beyond Age pension age.

### Family tax benefit part A

Family tax benefit (FTB) was introduced to help with the cost of raising children. FTB part A is the most common payment to help with the cost of raising children and is paid per child. It includes a supplement per child that becomes payable after the end of the financial year. FTB part B gives extra assistance to single-parent families and to couple families where one income is low. It is paid on a per family basis and includes a supplement that becomes payable after the end of the financial year. FTB part A and B are income tested on family income.

### Newstart allowance

Newstart allowance is the major payment for unemployed people who are aged 22 years and over, but under the qualifying age for the age pension. Recipients must satisfy the activity test by seeking work or participating in an activity designed to improve their employment prospects. Data include recipients who are determined to be current (i.e. entitled to be paid) on the Centrelink payment system and are not in receipt of CDEP participation supplement or a zero rate of payment.

## Emergency services, schools and hospitals

### Fire stations

Does not include Rural Fire Brigade.

### Hospitals

Includes both private and public hospitals and health clinics. Excludes public dental and psychiatric facilities.

### Police stations

Does not include Police Beats.

### Schools

Includes both private and public schools and centre types of associated facility, campus, community school, non-state school, special campus, special school, specific purpose school, state high school and state school.

## Employment by industry

### Employment by industry

Based on Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 edition, revision 2 published in 2013.

### Industry subdivision

The industry subdivision refers to the 2-digit industry classification from the Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 edition, revision 2 published in 2013.

## Employment by occupation

### Employment by occupation

Based on Australian and New Zealand Standard Classification of Occupations (ANZSCO), 2006 edition, version 1.2 released 2013.

### Occupation sub-major group

The occupation sub-major group refers to the 2-digit occupation classification from the Australian and New Zealand Standard Classification of Occupations (ANZSCO), 2006 edition, version 1.2 released in 2013.

## Homeless persons

The prevalence estimates of homelessness cover usual residents in Australia on Census night and do not include:

- overseas visitors,
- people who were enumerated in offshore, shipping or migratory regions,
- people on an overnight journey by train or bus.

## Indigenous

Refers to people who identify themselves as being of Aboriginal and/or Torres Strait Islander origin.

## Median age

Median estimates have been calculated by the ABS and Queensland Treasury.

## Median rent

Medians for regions with less than 10 lodgements in the 12 month period have not been reported.

Median rents do not include lodgements listed with \$0 rent.

Rental bonds data published by QGSO may not be directly comparable with data published by the Residential Tenancies Authority (RTA) due to geocoding of Rental Bonds data by QGSO and updates to bond records, including where additional bond forms are processed by RTA after quarterly data are supplied to QGSO.

## Medians and averages

### Average household size

Applicable to number of persons usually resident in occupied private dwellings. It includes partners, children, and co-tenants (in group households) who were temporarily absent on Census Night. A maximum of three temporary absentees can be counted in each household. It excludes 'Visitors only' and 'Other non-classifiable' households.

### Average number of persons per bedroom

Applicable to occupied private dwellings. It excludes 'Visitors only' and 'Other non-classifiable' households.

### Median mortgage repayment

Applicable to occupied private dwellings being purchased and includes dwellings being purchased under a rent/buy scheme. It excludes 'Visitors only' and 'Other non-classifiable' households.

### Median total family income

Applicable to families in family households. It excludes families where at least one member aged 15 years and over did not state an income and families where at least one member aged 15 years and over was temporarily absent on Census Night.

### Median total household income

Applicable to occupied private dwellings. It excludes households where at least one member aged 15 years and over did not state an income and households where at least one member aged 15 years and over was temporarily absent on Census Night. It excludes 'Visitors only' and 'Other non-classifiable' households.

### Median total personal income

Applicable to persons aged 15 years and over.

## New house and vacant land sales

Vacant residential land have been defined as vacant - large house sites, vacant urban land and vacant rural land between 140m<sup>2</sup> and 2,500m<sup>2</sup> within planning zones. New house and land have been defined as a single unit dwelling or dwelling large house site on a newly registered block of land between 140m<sup>2</sup> and 2,500m<sup>2</sup>. All reporting periods are based on the contract date and not the settlement date.

## Non-school qualification by field of study

Excludes persons with a qualification out of the scope of the Australian Standard Classification of Education (ASCED).

## Non-school qualification by sex and age

Excludes persons with a qualification out of the scope of the Australian Standard Classification of Education (ASCED).

## Population projections

Population projections are based on a medium series.

## Proficiency in spoken English

Based on the most common Language Spoken at Home responses reported in the 2011 Census for Australia.

## Reported offences

The reference date for reported offences is the date an offence is reported to or detected by police. Data are based on the location in which the offence occurred. Rates are calculated using the Estimated Resident Population (ERP) as at 30 June of the reported financial year. The ERP for the latest year has been linearly extrapolated using the change between the previous two years.

### Offences against the person

The offence division of offences against the person includes the following offence sub-divisions: homicide (murder); other homicide; assault; sexual offences; robbery; and other offences against the person.

### Offences against property

The offence division of offences against property includes the following offence sub-divisions: unlawful entry with intent; arson; other property damage; unlawful use of motor vehicle; other theft (excluding unlawful entry); fraud; and handling stolen goods.

### Other offences

The offence division of other offences includes the following offence sub-divisions: drug offences; prostitution offences; liquor (excluding drunkenness); gaming, racing and betting offences; breach of domestic violence protection orders; trespassing and vagrancy; weapons act offences; good order offences; stock related offences; traffic and related offences; and miscellaneous offences.

## Residential dwelling sales

Medians are only calculated where there are ten or more sales over the time period.

### Attached dwellings

Attached dwellings include multi-unit dwellings (flats), building units or group titles within planning zones.

### Detached dwellings

Detached dwellings include single unit dwellings or large house sites.

### Residential dwelling sales

Residential dwelling sales include both new and established dwellings and all reporting periods are based on the contract date and not the settlement date.

## Residential lot registrations

Lot registration is the final stage in the development of new residential lots, and it is only after the title is registered that a lot legally exists. Lot registrations data provide an indication of the volume of new lots developed and intended for residential purposes.

The Queensland Government Statistician's Office applies a range of filters to DNRm's computer inventory of survey plans data, such as parcel size and zoning information, to extract the lots registered for residential purposes. 'Urban residential' lots include standard lots typically for detached houses (60m<sup>2</sup> to <2,500m<sup>2</sup>) and lots under community titles schemes for units and townhouses. For this monitoring program, 'low density residential' lots are defined as standard lots between 2,500m<sup>2</sup> and 5 hectares in size.

## Total family income

Median total family income estimates have been calculated by the ABS. Medians are only calculated where there were five or more total families. Median calculation excludes families where at least one member aged 15 years and over did not state an income and families where at least one member aged 15 years and over was temporarily absent on Census Night.

## Total personal income

Median total personal income estimates have been calculated by the ABS.

## Unemployment and labour force

Small Area Labour Force data have been generated from a Structure Preserving Estimation (SPREE) methodology using ABS and Centrelink data. As such these estimates can exhibit considerable variability and care should be taken when interpreting these values. For further information on these data, refer to the Australian Government Department of Employment website.
